

THE CATALYST

Updates

The general meetings that take place throughout the semester provide very unique learning opportunities. They allow people to learn more about several different companies that typically hire chemical engineering majors, and this provides a great opportunity to network and establish connections with people working in industry. This month, the companies that presented at our general meetings included Chevron Phillips Chemical, Oxy Chemical, and Fluor. If you want to purchase or renew your membership for AICHE, visit our website's Membership Information page.

On November 17th, we held a game night where members of AICHE were able to relax from school and play fun games which included a Mario Kart tournament.

On December 9th, AICHE held its first bake sale of the school year where several different deserts and treats were sold in order to raise money for AICHE. Many members who donated food for this AICHE Bake sale were able to be awarded points that would help improve their chances of receiving the end of the semester textbook reimbursement prize.

Attending these events are highly encouraged. Not only are they great networking opportunities with people who work in the industry, it is a great chance to build connections with many of your peers studying Chemical Engineering. Additionally, the 3 most active AICHE members will be reimbursed up to \$500 for textbooks.

Upcoming Events

General Meeting

November 2 7:30 pm
Chevron Phillips Chemical
JEB 106

General Meeting

November 16 7:30 pm
Oxy Chemical

Game Night

November 17 7:00 pm
JEB

General Meeting

November 30 7:30 pm
Fluor

AICHE Bakey

December 9 10 am - 3 pm
ZACH

Officer Spotlights

Maddie Beck is the **VP Publicity** for the Texas A&M University Chapter of AIChE. Her duties include taking care of all advertising and merchandise for AIChE and running a committee to help with the designs for advertising. She is in charge of the lobby merchandise sales in the JEB lobby held on the days of general meetings. She chose chemical engineering because she enjoys the sense of community it provides. In the future, she plans to work as a Plant Engineer for Flint Hills Resources.

Daniel Vanderklay is the **VP Finance** for the Texas A&M University Chapter of AIChE. His duties include coordinating and managing the budget for AIChE and working with the SOFC to help reimburse members for events. Additionally, he coordinates with industry sponsors to obtain donations and organize AIChE events such as general meetings and the Sophomore Retreat. He chose chemical engineering because it plays a key role in many of the industries important in the future. In the future, he plans to work for Texas Instruments after graduating.

Jose Santiago is the **VP Programs** for the Texas A&M University Chapter of AIChE. His duties include leading a committee that helps plan and improve the general meetings and the lunch and learn events offered throughout the semester. He chose chemical engineering because of his interest in math and chemistry. Additionally, he chose it because chemical engineering requires knowledge in all areas of science and allows you to pursue a career that makes you a jack of all trades.

AIChE Annual Student Conference

During this month, several members of the Texas A&M Chapter of AIChE attended the 2022 AIChE Annual Student Conference in Phoenix, Arizona. At this event, several students from AIChE chapters from different schools across the nation attended along with professionals who are a part of AIChE and working in the industry. This was a 4-day conference that had several other events each day that allow members of AIChE to connect and learn more about the Chemical Engineering field and its various components beyond what is learned in university.
